Disclaimer: The information provided in this analysis belongs to its owner only, in case of a minor the rights of its information are with his legal guardian. By agreeing to this analysis, you are giving your fingerprints voluntarily and in case of minor, you are representing him/her as a legal guardian or parent. It is also understood that these fingerprints are used only for analyzing and preparing this report. The content of this analysis is only for reference basis of the scientific research in the field of Dermatoglyphics and statistical study conducted based on the finger print analysis. The decision to follow any instruction, advise, suggestion or recommendation completely depends upon you and you will be solely responsible for the consequences of the same. We as an organization or any of its representatives are not responsible for any consequences under any circumstance. Before taking any crucial decision, please refer to your family doctor, psychiatrist or psychologist. The results are only indicative and the company or any authorized representative of the company shall in no case be liable for failure in any particular course of study or activity recommended in the report or any important decisions taken based on this report. Thus, it should not be used as a standalone instrument for any important decision-making.

MINDDESTINY SOLUTIONS- DMIT

A Sure Way to Discover Your Inborn Talents & Personality

Dermatoglyphics Multiple Intelligence Test introduced by MINDDESTINY SOLUTIONS, is a set of assessment systems developed by scientists and medical experts based on Genetics, Embryology, Dermatoglyphics, Neuroscience and Pediatric Psychology through methods of observation, record, comparison and summarization in combination with clinical experience.

1926, Dr. Harold Cummins coined the word '**Dermatoglyphics**' - the scientific study of skin ridge patterns found on the palms of human hands. Dr. Cummins achieved world recognition as the "Father of Dermatoglyphics". The findings of his lifetime studies and the techniques he developed, known as the Cummins Methodology, is accepted as important tools in tracing genetic and evolutionary relationship. This methodology has gained common usage in diagnosis of some types of mental retardation, schizophrenia, etc.

Later in 1950 a Canadian neurosurgeon, Professor Penfield published a paper - "Cross-sectional diagram of brain in relation with various parts of body" which indicates close relation between fingerprints and cerebrum.

In 1981, Professor Roger W. Sperry and his research partner were awarded Noble Prize in Biomedicine for their study on functions of right and left cerebral hemispheres and double brain theory.

Former USSR was using Dermatoglyphics as one of the methods to select candidates for Olympics Games since 1970's. As it turned out, the USSR took home 50 gold medals in 1972 and 125 in 1976.

Medical experts, through observation, recording, comparison, induction and clinical trials confirmed that fingerprints provide accurate analysis of a person's inborn talents. The assessment system analyses the distribution of brain's learning capacity and allocation of cerebral function of an individual and provides relevant statistical report of individual's innate intelligence. Hence, it allows development of the individual in realm of dominant intelligence.

This can help the Guide/Mentor to understand the innate characteristics and effective communication mode of the individual. It will provide them the most appropriate learning habits from young age and improve learning ability effectively. It can also help the Guide/Mentor to discover the potential of the individual and understand the development of multiple intelligence. Thus, it will be easy to improve their weakness during learning process, in order to achieve all-round development.

Lastly, we would like to convey the message to all Guides/Mentors and Individuals that the aim of this test is to allow you to fully understand and respect individual differences of each person and provide education and/or training accordingly.

The vital factor of an individual's intelligence is determined by "neural network connection of brain cells", it is not only congenital nor destiny, but also largely determined by acquired environmental stimulation and early learning.

To all dearest Parents/Educators/Individuals, we are looking forward to build up a link of wisdom for you and others with our foremost sincerity. Let us work together to help each individual in getting an effective start from the very beginning!

How to Interpret This Report

Dear Test,

When you get this report, we recommend that you should view it by following these steps. This will help you to understand the Brain's Potentials very clearly.

1: Ensure you are holding the correct report. Check the name on the Personal Detail Page.

2: Our Brain's Map:

a) Our brain is divided into two hemispheres, Left and Right. Each hemisphere of the brain has its own strengths. Fingers of Right Hand represent the functions of Left Brain & fingers of Left Hand represent the functions of Right Brain. Different fingers reflect different intelligences. Each intelligence has its own weightage. Total distribution of intelligences' percentage will be 100%.

b) This value represents the neo-cortex neuron intensity, which means, one function corresponding to high degree of value will have higher RC value. Different pattern types will show the distribution of different values. In normal circumstances for most people, the values will range from 8 to 30. If the value is high, it reflects that brain cortex activity level for that function is high.

c) If the RC value or percentage (%) distribution of any specific intelligence shows "0" or Arch Type, then the minimum range of that value can go to 0 and maximum can go to infinity. The potential of the RC values will be in the range 0 to infinity. This simply means that this specific intelligence contains high plasticity.

d) The average value of RC is 10%; if RC value's distribution in specific intelligence is less than 5.99%, it means it is only the result of comparison with yourself, it does not necessarily indicate that you are weak in that particular intelligence.

e) Difference between the percentage (%) of left-brain and right brain's RC should be around 5-7%. It is a sign of normal range. If the difference is more than 7%, then the weak side will affect the other side of the brain. However, this does not show any serious concern. One will have to focus on the weak side to balance it.

3: Potential advantages – In accordance with the RC values, one will be able to find the strengths through the level of activity in brain cortex. High percentage activity in brain cortex in specific intelligence means that it is his/her strength. This will help the participant to grasp (INPUT) any knowledge with his/her own strength. This also means that participant can even demonstrate maximum energy (OUTPUT) with the powerful potential (inherent strength).

4: Potential to be developed – In accordance with the RC value, the intelligence, which is not very strong, will be marked on lower part of the potential. It reminds one that potential of the brain cortex activity is low for that specific intelligence. This means that one should pay more attention to develop the potential through focused way in the area of that intelligence.

5: Everyone has the potential for a certain innate quality. Through stimulation and learning, one can become a better human being. **Uphold the idea that each of us can fully stimulate own potential and can achieve bright future.**

6: Neuroplasticity – The brain has amazing adaptive characteristics, it can train and fine-tune existing capabilities. The 'MINDDESTINY SOLUTIONS DMIT Report' provides the mapping of our inborn nerve cells intensity. Nevertheless, even though we produce no new nerve cells after the time of birth, nurturing and training can help our nerve cells in our cerebral cortex to be creative by wiring incredibly complex circuits. Through learning mechanism, the brain continues to rewrite and change its circuitry throughout our lives.

Congratulations, you have **MINDDESTINY SOLUTIONS - Dermatoglyphics Multiple Intelligence Test Report'** which will help you to know about yourself. Therefore, now put your strengths into action, work on the areas of your weakness & achieve better future.

Yours sincerely,

MINDDESTINY SOLUTIONS – DMIT Research Team.

Brain Lobes Functions and TFRC Distribution Map

LEFT BRAIN		
R1: U	1	15.58%
Organization & Management Ability: Planning, Judgment, Reasoning, Problem Solving, Logical Thinking, Self-reflection, Rational Thinking, Management & Organization Ability, Decision Making, Impulse Control		
R2: U	3	11.69%
Logical Analysis Ability: Logic, Reasoning, Analytical Ability, Numerical Concepts, Computation Analysis, Conceptual Understanding,		
R3: U	5	11.18%
Fine Motor Skills Manual Dexterity, Control of Small Muscles (like fingers) Action Sequencing & Understanding Left-Right Direction & Mirror Movement.		
R4: U	6	10.91%
Language/Listening Ability Decoding of Speech Sounds, Comprehension of Speech & Mediating, Verbal Memory Processes, Language Understanding, Hearing, Short Term Memory & Sound Identification.		
R5: U	10	4.88%
Observation/Reading Ability: Visual Identification, Reading Ability, Observation of Object Existence, Distance, Spatial, Speed, Classification, Identification.		

Right Hand

Left Hand

Your TFRC is :

127.00

STRENGTH	AVERAGE	WEAK
10.00% & above	8.00%-9.99%	0.00% - 7.99%

RIGHT BRAIN		
L1: U	3	11.69%
Creativity & Interpersonal Ability: Leadership Behavior, Interpersonal Relationship, Creative Thinking, Emotional Functions, Objective Driven Action, Goal Setting, Intuition, Integration of Information, Spontaneity, Socialized Personality.		
L2: As	9	5.28%
Visual - Spatial & Imagination Ability: Imagination, Abstract Thinking, Art, Concept, Image Visualization, 3D.		
L3: U	8	5.96%
Gross Motor Skills Movement & Muscle Coordination. Feeling of Body in Space, Coordination & Rhythmic Movement, Integrates Sensory Information.		
L4: R	2	14.70%
Musical & Emotion Feeling Ability Hearing of Sound Ability to Perceive Sound, Tones, Melody in Music, Feel of Emotion & Emotional Response.		
L5: U	7	8.13%
Visual Ability: Perception of Pictures & Visual Sensory Information, Image Appreciation, Visual Recognition of Shapes & Colors and Aesthetic Sense.		

Inborn Intelligence Potential from Test is Type E

TFRC

The value of TFRC does not directly represent a person's intelligence (IQ), but it is an indication of an individual's inborn learning capacity. An individual with TFRC lower than 60 needs to be patient in his/her learning process and requires sufficient stimulation and reinforcement. An individual with TFRC 150 and above has high learning capacity and a very good short-term memory. Through learning, brain will create and organize the synaptic connections in response to extrinsic circumstances.

TFRC is reflection of a person's inborn learning capacity. It is commonly known as "Neocortex Brain Cell Capacity." It is our inborn neuron capacity. At birth, 100 billion nerve cells in our cerebral cortex set about wiring incredibly complex circuits (Some 5,000 to 10,000 Connections to each nerve cell).

Through learning mechanisms, the brain continues to rewire the circuitry throughout our lives. Therefore, learning is important to stimulate the linkage of our neurons. Arch type pattern fingerprints indicate a potential value in between Zero to Unlimited. It represents that particular potential is high in plasticity.

TFRC	TYPE	INBORN INTELLIGENCE POTENTIAL
Below 60	Type G	Low Potential
60 to 100	Type F	Adequate Potential
101 to 140	Type E	Normal Potential
141 to 180	Type D	Good Potential
181 to 200	Type C	Very Good Potential
201 to 220	Type B	Excellent Potential
221 & above	Type A	Over Active

My Brain

Left Brain 54.23%

Knows Object's Name _____
 Uses Logic _____
 Analytical _____
 Practical _____
 Facts Rule _____
 Detail Oriented _____
 Reality Based _____
 Objective _____
 Safe _____
 Maths & Science _____
 Word & Language _____
 Management _____
 Planning & Judgement _____

Right Brain 45.77%

Knows Object's Function _____
 Uses Feeling _____
 Creative _____
 Thinks Out Of The Box _____
 Imagination Rules _____
 Big Picture Oriented _____
 Fantasy Based _____
 Subjective _____
 Risk Taking _____
 Intuitive & Artistic _____
 Beliefs _____
 Leadership _____
 Vision & Conceptualization _____

Left Brain Dominance:

Analytical brain is more inclined towards self-awareness, logical thinking, fine motor skills based activities, language and grammar and may have a hidden love towards nature. They are generally good in academics. They have convergent thinking and can bring their energy and focus at one point. They prefer to respond to Verbal instructions. They like to solve the problems by looking at the parts of things. They are able to locate the differences in similar things easily. They are more planned and structured. Prefer multiple-choice tests. They have the ability to control their feelings and emotions. They like building blocks, puzzles, word forming, problem solving, crosswords etc.

Right Brain Dominance:

Creative brain is more inclined towards interpersonal skills, imagination, gross motor skills activities, music, colours, pictures, dance, art, rhythms, acting, painting, modelling, fashion, outdoor sports etc. They are generally good in extracurricular activities, primarily creative ones. They tend to throw the rules out of window. They have divergent thinking, which is full of creativity and ideas. In addition, they are often lost in their own ideas, thoughts and world. They may be physically present but mentally absent. Right brain people prefer to respond to demonstrated instruction. They like to solve the problems by looking at the problem as a whole. They are able to draw the whole picture in their mind easily. They are more intuitive and work upon feelings. Their emotions and feelings have no limits, and they generally come out.

PERSONALITY & BEHAVIOR

YOUR PERSONALITY TRAITS:

Dr. William M. Marston was a psychologist and an antropologer who after studying thousands of human behaviors and their personalities developed the concept of DISC profile. It divides the human personalities into 4 categories i.e. Dominant, Influential, Steady and Compliant. DISC profile has been in use for many years for multiple purposes like sales, marketing, management, HR, alliances etc.

Your Primary Personality is DOVE

Your Secondary Personality is DOVE

The above chart reflects your personality type. For better understanding, please refer to your nearest MINDDESTINY SOLUTIONS counsellor.

VAK Learning Styles

What is My Learning Style?			
Visual		Auditory	
 23.33%		 45.93%	
I prefer to see information written on a chalkboard, supplemented by visual aids and assigned readings.		I can remember best by listening to a lecture that includes information, explanation & discussion.	
I like to write things down or take notes for visual review.		I require verbal explanation of diagrams, graphs or visual directions.	
I am skilful with graphs and charts and enjoy developing & making them.		I can tell which sounds match when presented with pairs of sounds.	
I can easily understand and follow directions on maps.		I do best in academic subject by listening to lectures and tapes.	
I can understand a news article better by reading about it in the newspaper than by listening to a report about it on the radio.		I learn to spell better by repeating words aloud, than by writing the words on paper.	
I think the best way to remember something is to picture it in my head.		I would rather listen to a good lecture or speech, than read about the same material in a textbook.	
Visual learners		Auditory learners	
→Use white space in hand-outs for notes and pictures. →Use visuals (e.g., graphs, posters, maps, charts, graphic, Organizers). →Use highlighters/coloured pens.		→Respond to oral questions. →Pose questions to classmates. →Participate in auditory activities. (e.g., brainstorm) →Listen to audio tapes. →Record lectures & listen to them.	
		Kinesthetic	
		 30.74%	
		I prefer to use posters, models or actual practice and do other activities in class.	
		I enjoy working with my hands or making things.	
		I remember best by writing things down several times.	
		I play with coins or keys in my pockets.	
		I chew gum, munch snack while studying.	
		I learn the spelling of words by 'finger spelling' them.	
		Kinesthetic learners	
		→Do activities that involve movements and touch. →Write key ideas on larger written surfaces. →Walk & Read. →Underline important points.	

Counsellor's Remarks

Feedback Form

This section helps us to evaluate how effective the experience to undergo **MINDDESTINY SOLUTIONS DMIT** Test was and your overall feedback along with references if any are sought.

*How would you rate your **knowledge, skills and findings about you** before and after the test in the following areas (please tick the most appropriate response):*

1. The **clarity** about your own skills, strengths, weaknesses and multiple intelligences:

Before Test: ☐ Poor ☐ Fair ☐ Good ☐ Excellent
After Test: ☐ Poor ☐ Fair ☐ Good ☐ Excellent

2. Your **confidence** to work on the recommendations:

Before Test: ☐ Poor ☐ Fair ☐ Good ☐ Excellent
After Test: ☐ Poor ☐ Fair ☐ Good ☐ Excellent

3. Likelihood of you **implementing the results** of the Test:

After Test: ☐ Poor ☐ Fair ☐ Good ☐ Excellent

4. Based on your own experience, would you recommend "**MINDDESTINY SOLUTIONS DMIT** Test" to relatives, friends?

Recommend to Others: ☐ Yes ☐ No ☐ Maybe
